1. Introduction

Nexus Communications sells **Dial-Up**, **Broadband** and **Landline** connections through a retail shop in every city. The Nexus Service Marketing System keeps every step on record: the order, the feasibility check, the connection, the equipment, the monthly postpaid bill and the payment.

This guide explains, screen by screen, how each type of user works with the system. Every user signs in on the same login page and is taken to their own dashboard.

1.1 Who uses the system

Role	What they do	Section
Visitor	Reads about the services, compares plans, tracks an order, registers	3
Customer	Places and tracks orders, sees connections and bills, uploads documents, gives feedback	4
Retail shop staff	Registers walk-in customers, places orders, collects bill payments	5
Technical staff	Checks feasibility, creates connections, issues equipment, suspends overdue connections	6
Accounts staff	Generates monthly bills and records payments	7
Administrator	Maintains cities, shops, employees, plans, discounts, vendors, stock; watches reports	8

1.2 The life of an order

1. The customer (or a retail shop) places an order. The system gives it an **order number**, for example D0000000001.
2. Technical staff check whether the address can be served (**feasibility**).
3. If it is feasible, technical staff create the **connection**. The customer receives a 16-character **account ID**, for example B001000000000001.
4. Every month the accounts team generates a **postpaid bill**. The first bill includes the refundable security deposit.
5. The customer pays at any Nexus shop. Unpaid bills past their due date can lead to the connection being suspended.

2. Getting Started

2.1 What you need

- A computer, tablet or phone with an up-to-date web browser (Chrome, Edge, Firefox or Safari).
- The address of the Nexus website (when running locally: http://localhost:5294).
- A username and password. Customers register themselves; staff accounts are created by the administrator.

2.2 Registering as a customer

1. Click **Register** at the top right of any page.
2. Fill in your name, contact details, address and city, then choose a username and password.
3. Click **Create account**. You are signed in and taken to your customer dashboard.

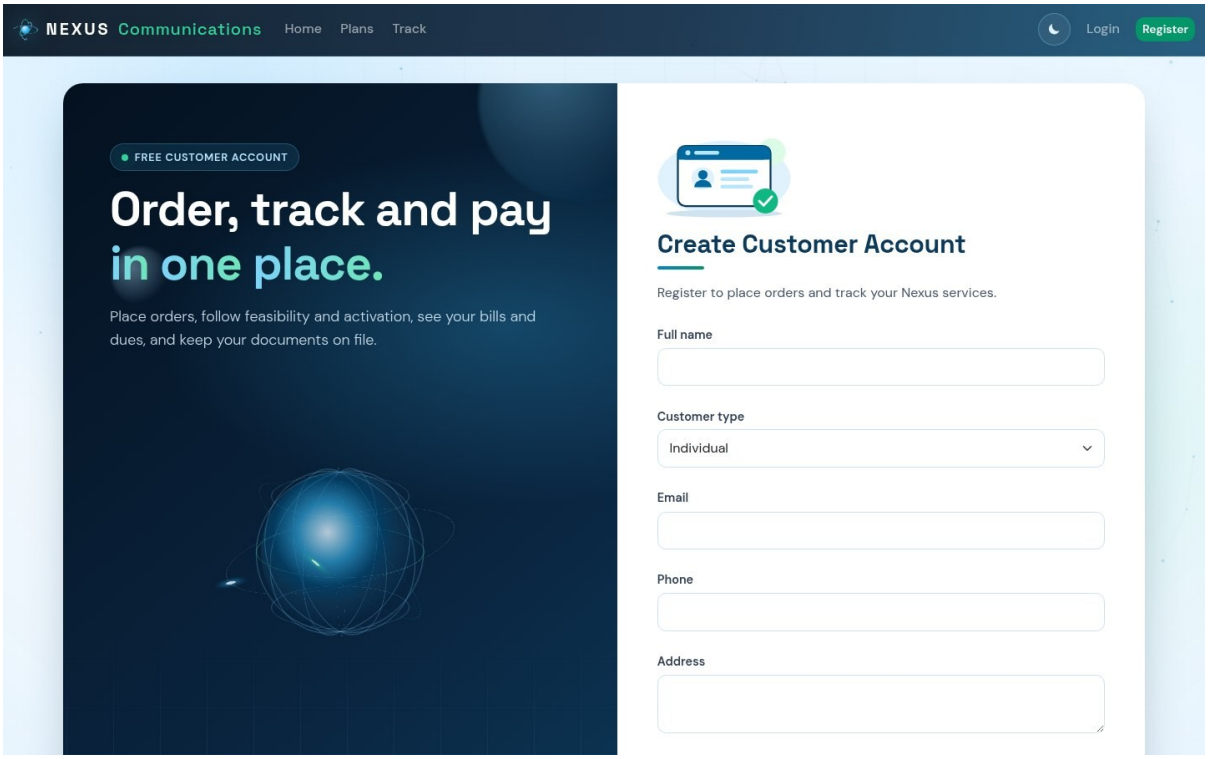

Figure 1 - Register page

2.3 Signing in and out

1. Click **Login** at the top right.
2. Enter your username and password and click **Log in**.
3. You are taken to your dashboard. Your menu shows only the pages for your role.
4. To sign out, open your name at the top right and choose **Logout**.

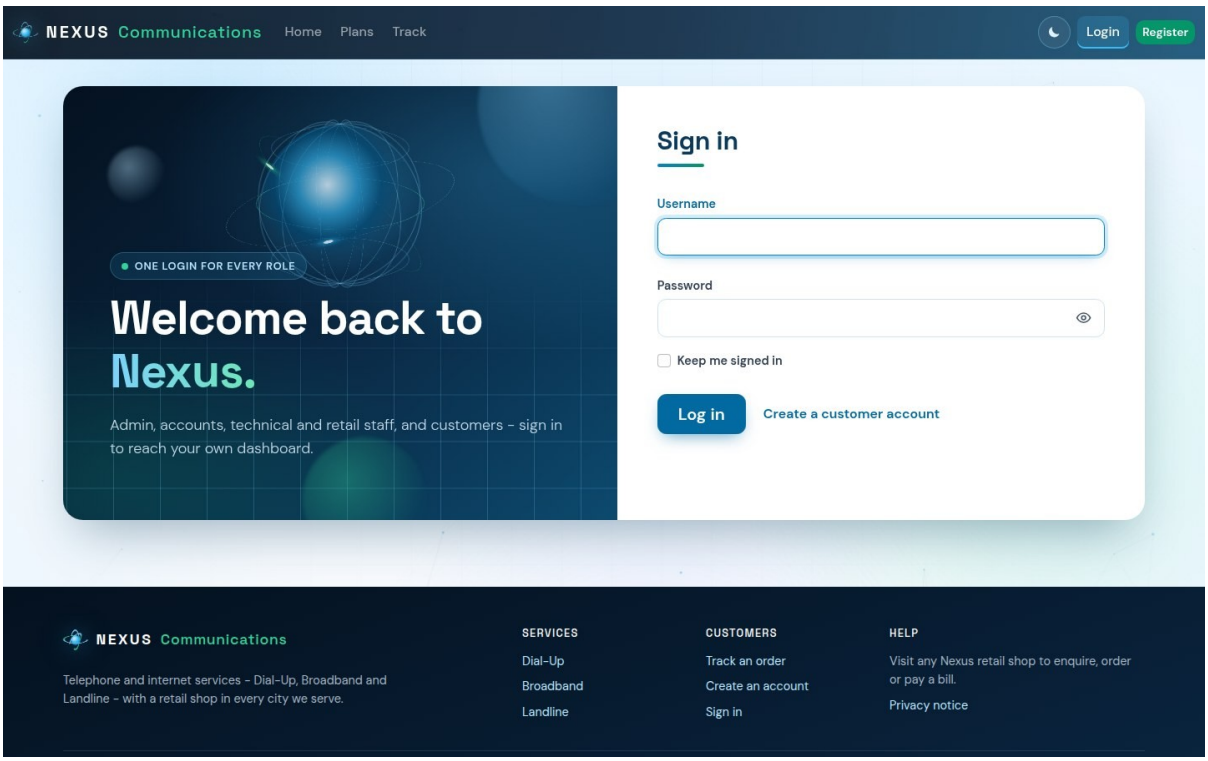

Figure 2 - One login page for every role

> **Tips**
>
> The menu item of the page you are on is highlighted in the top bar.
>
> Cards you can click light up and lift slightly when you point at them.

2.4 Light and dark mode

Click the round **sun / moon** button in the top bar (on a phone it is inside the menu, labelled **Theme**). The whole site switches between a light and a dark look straight away, and the choice is remembered the next time you open the site on that computer.

- **Light mode** - white cards on a pale blue background; best for bright rooms, projectors and printing.
- **Dark mode** - dark navy cards; easier on the eyes in a dim room.

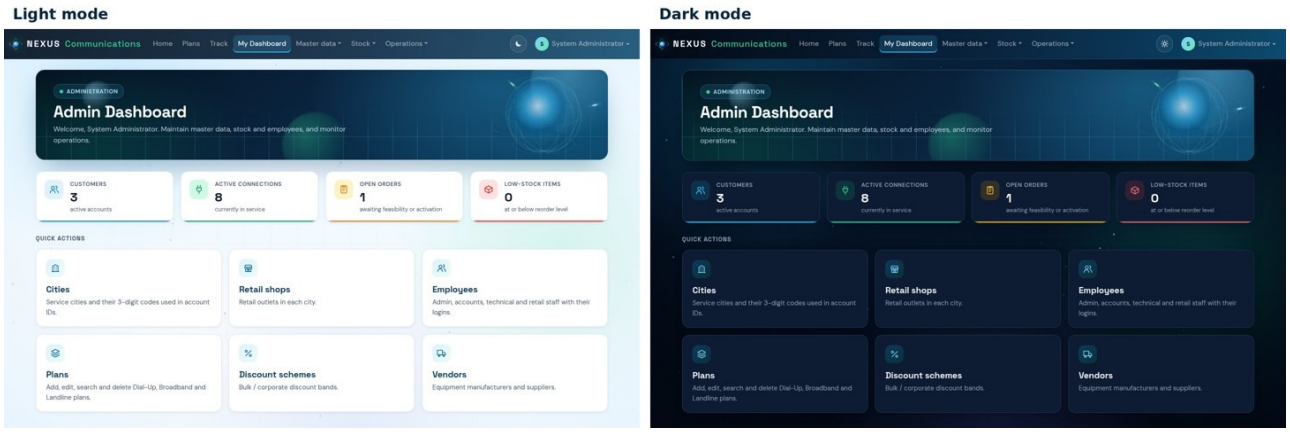

Figure 3 - The same page in light mode (left) and dark mode (right)

3. Public Pages

3.1 Home page

The home page introduces the three services, the cities served, the bulk discount bands and how the process works. From here you can compare plans, track an order or register.

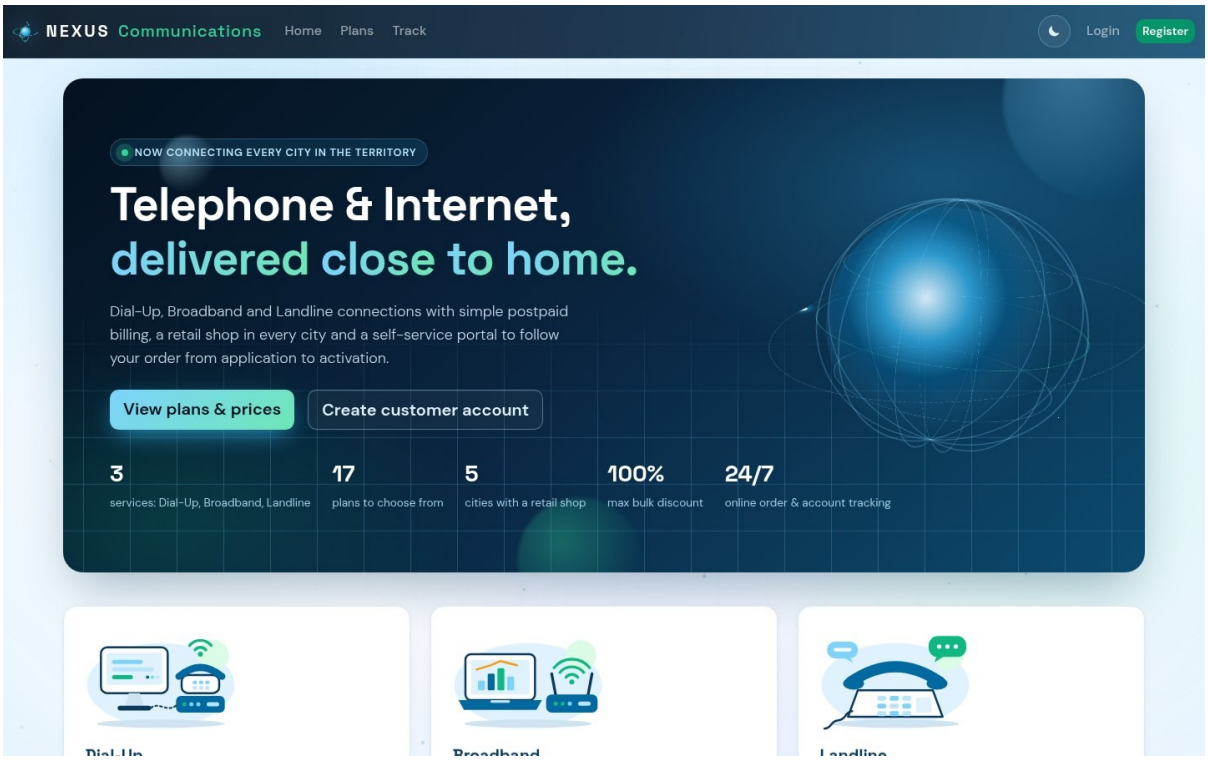

Figure 4 - Home page

3.2 Plans and prices

Click **Plans** in the menu. Plans are grouped by service; use the Dial-Up / Broadband / Landline tabs to jump to a group. Each card shows the price, the period it covers, what is included and the refundable deposit.

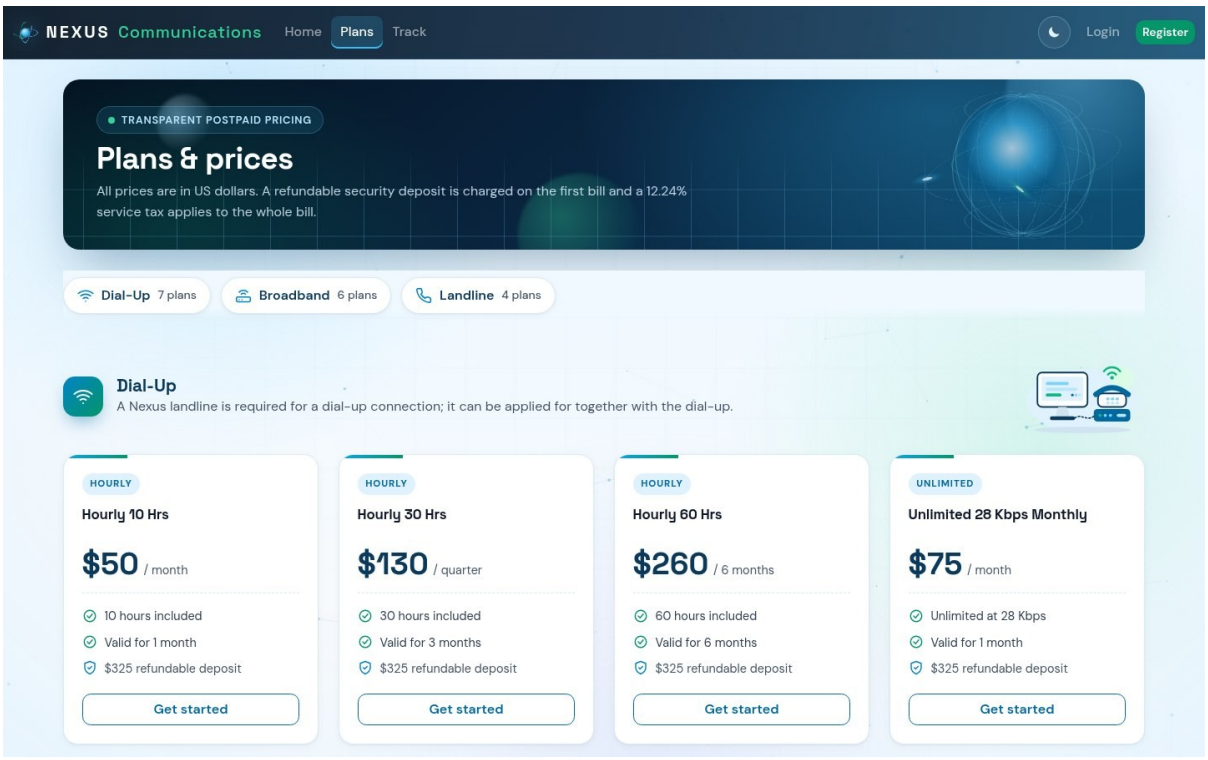

Figure 5 - Plans and prices

3.3 Tracking an order or connection

1. Click **Track** in the menu.
2. Enter your 11-character order number (for example D0000000001) or your 16-character account ID.
3. Click **Search** to see the current stage of the order or connection (on the home page the button is **Check status**).

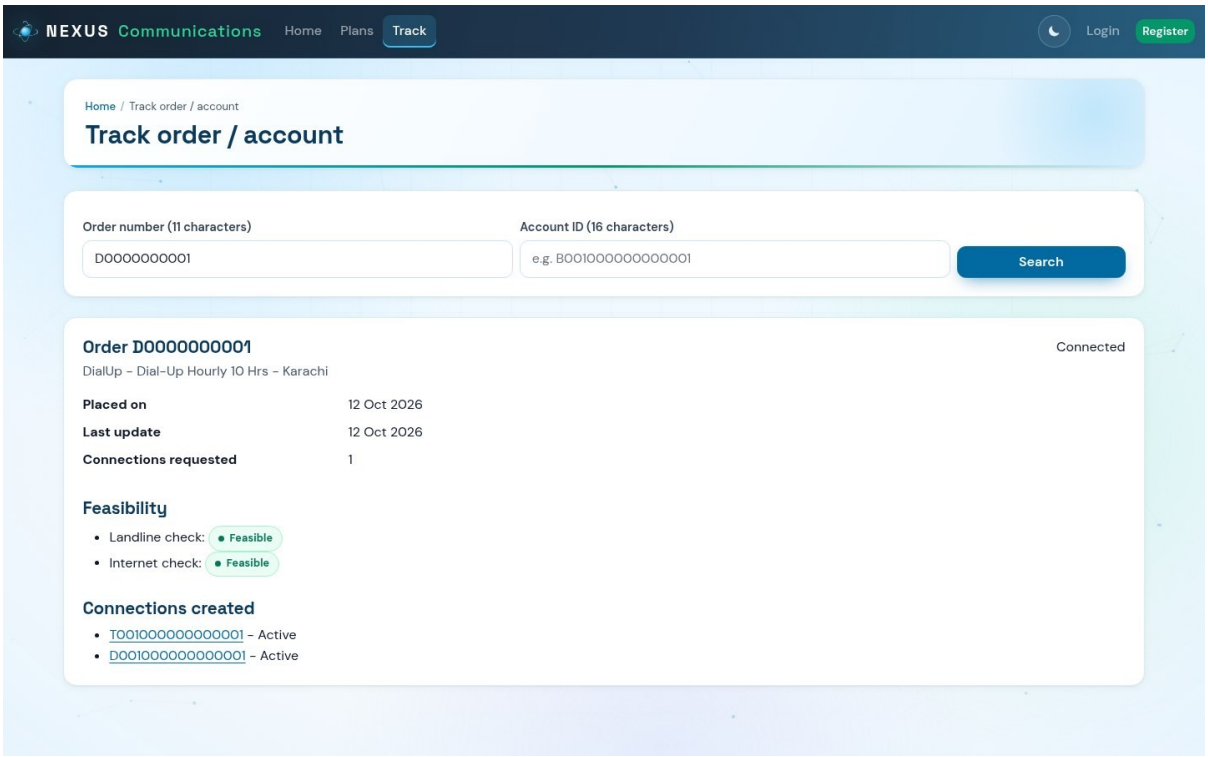

Figure 6 - Tracking an order

4. Customer Guide

4.1 Dashboard

After signing in you see your dashboard: open orders, active connections, the balance still due and quick links to every customer page.

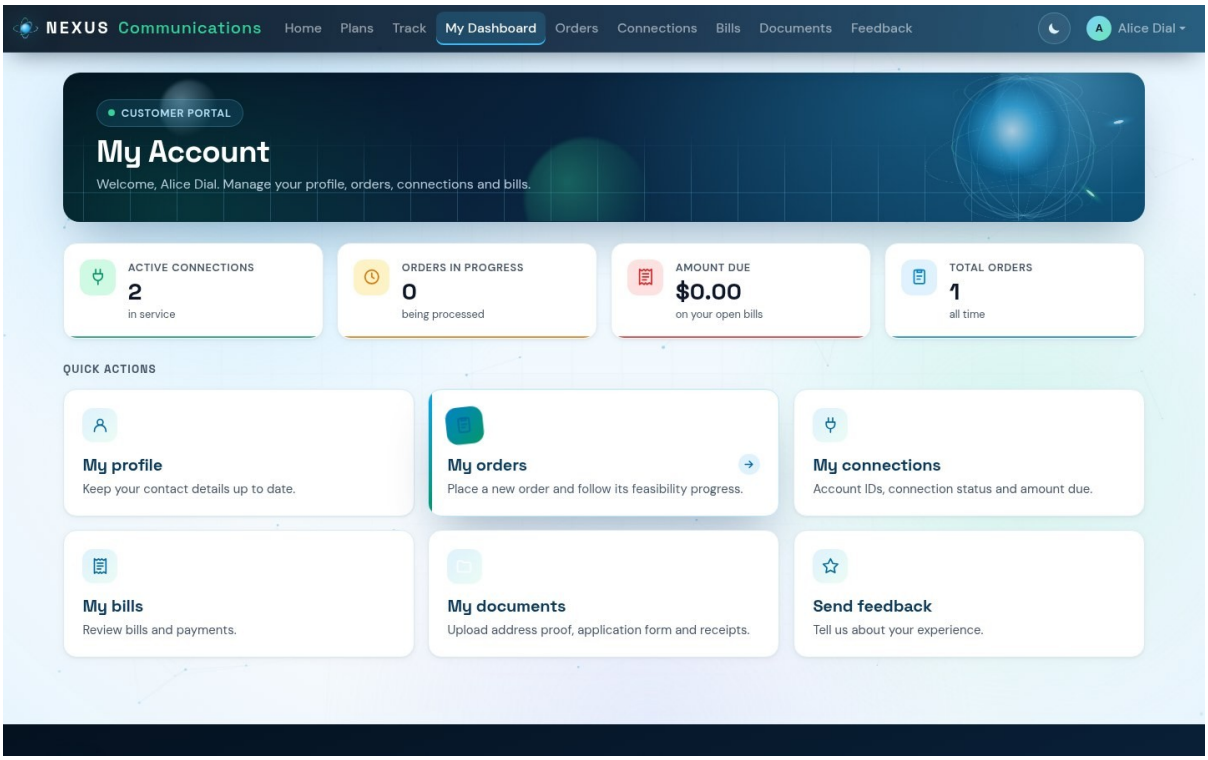

Figure 7 - Customer dashboard

4.2 Placing an order

1. Open **Place order** from the dashboard or the menu.
2. Choose the **connection type** - Dial-Up, Broadband or Landline - and then a **plan**.
3. Dial-Up needs a Nexus landline. If you do not have one, also choose a **landline plan**: both are ordered together.
4. Enter the **installation address** and **city**, and the **number of connections** (10 or more gives a bulk discount).
5. Click **Place order**. Note the order number shown - you can track it at any time.

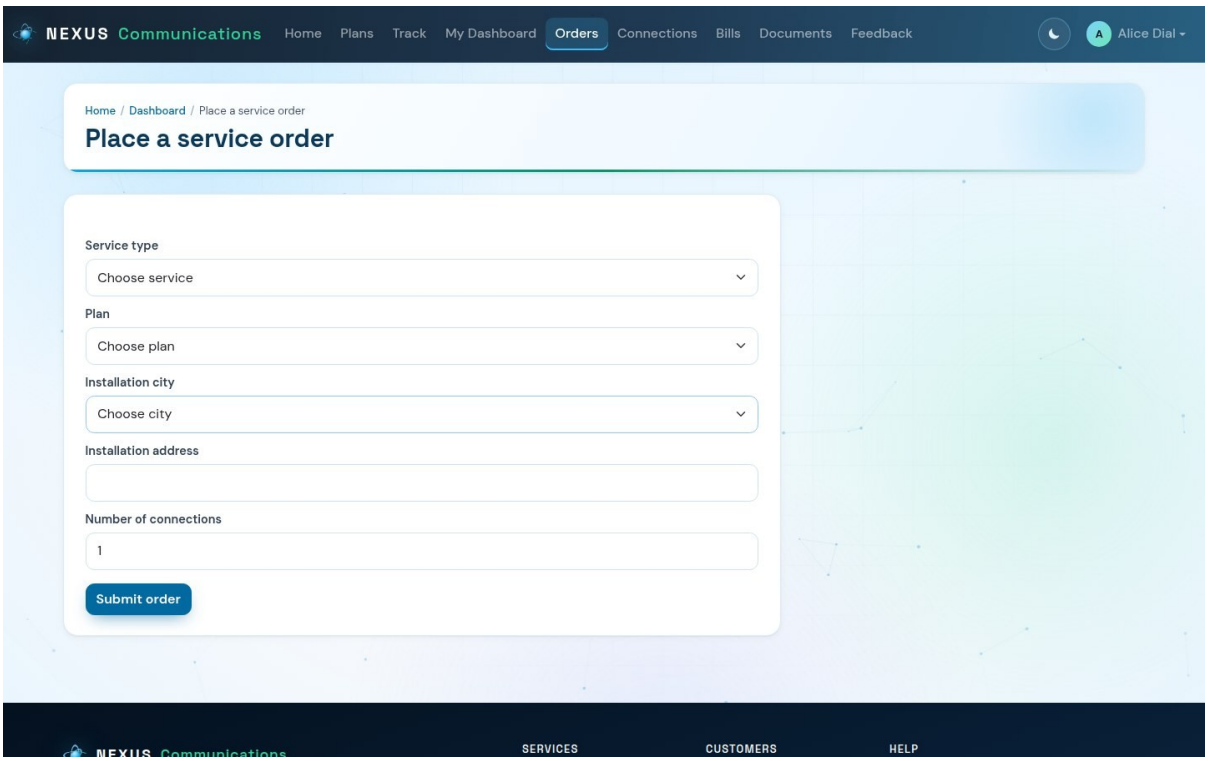

Figure 8 - Placing an order

4.3 My orders

My orders lists every order with its status. Open an order to see its details. An order that has not yet been connected can be cancelled with **Cancel order**.

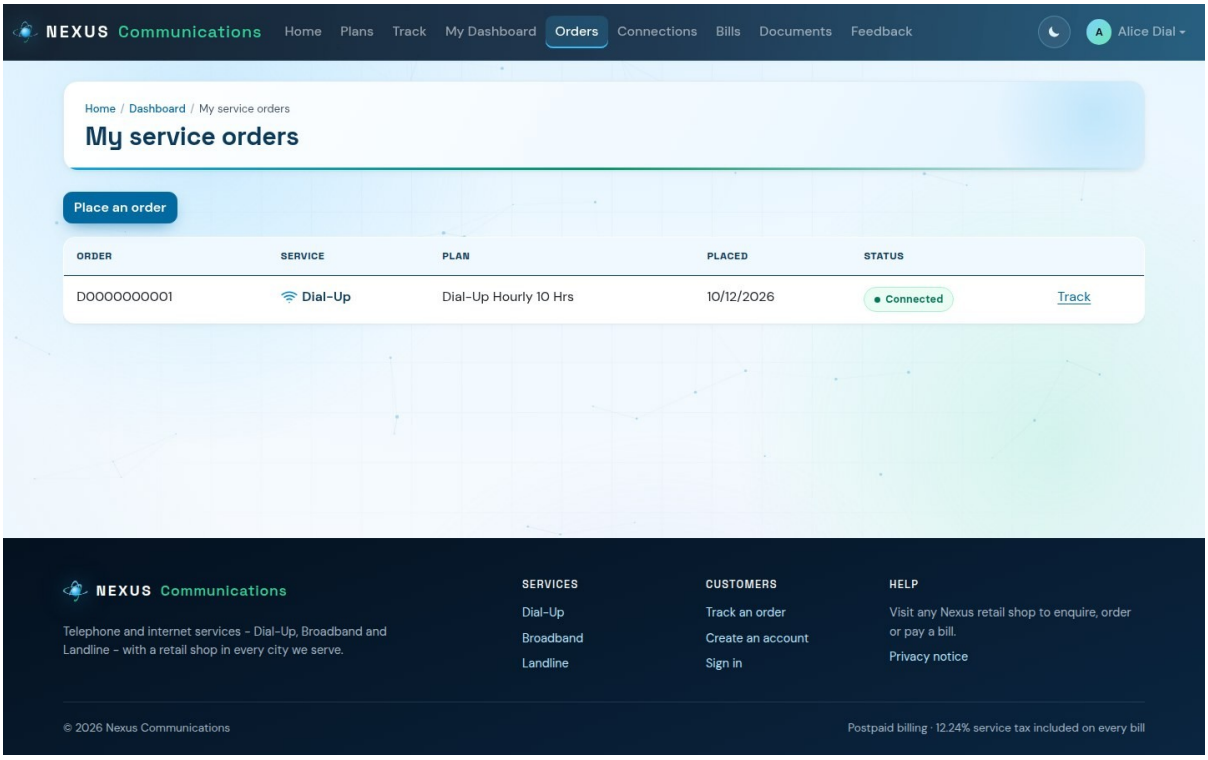

Figure 9 - My orders

4.4 Connections

Connections lists your connections with their account IDs, plan, status (Active, Temporarily inactive, Permanently inactive) and the equipment supplied.

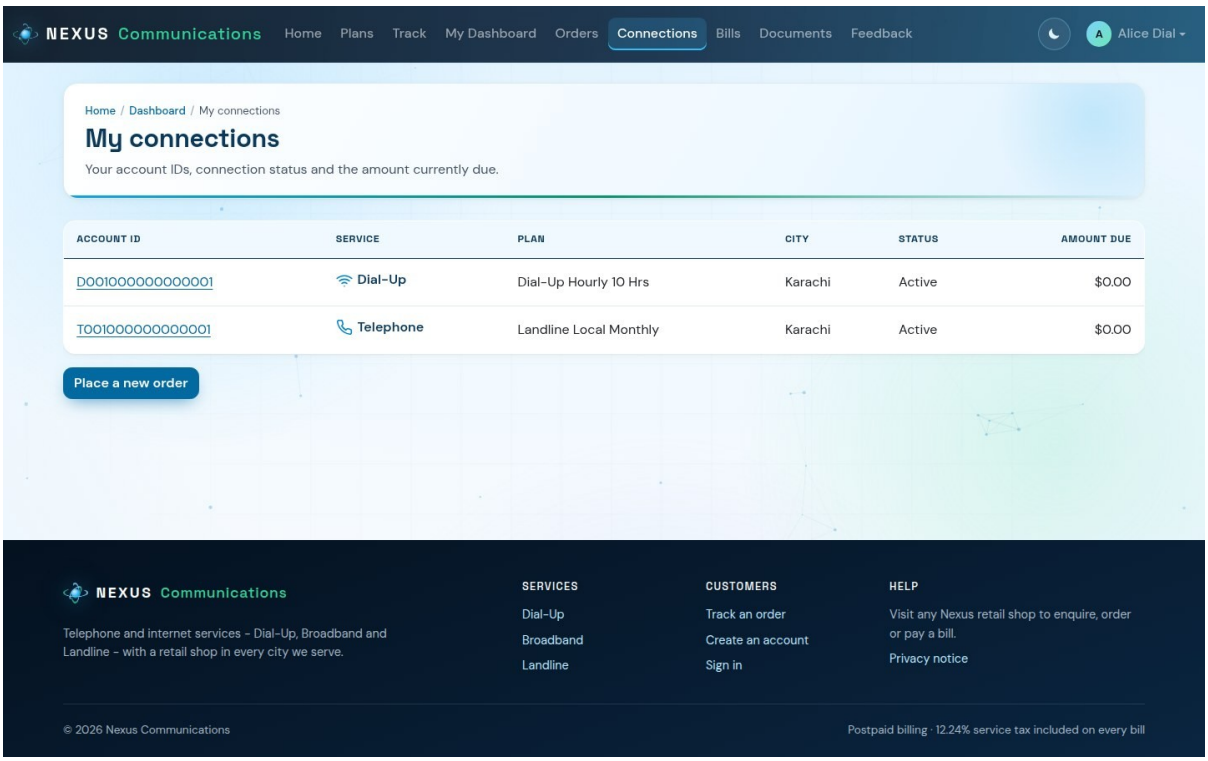

Figure 10 - My connections

4.5 Bills

Bills shows every bill, itemised: plan charge, call charges, deposit, discount and 12.24% service tax, with what has been paid and what is still due. Pay at any Nexus retail shop.

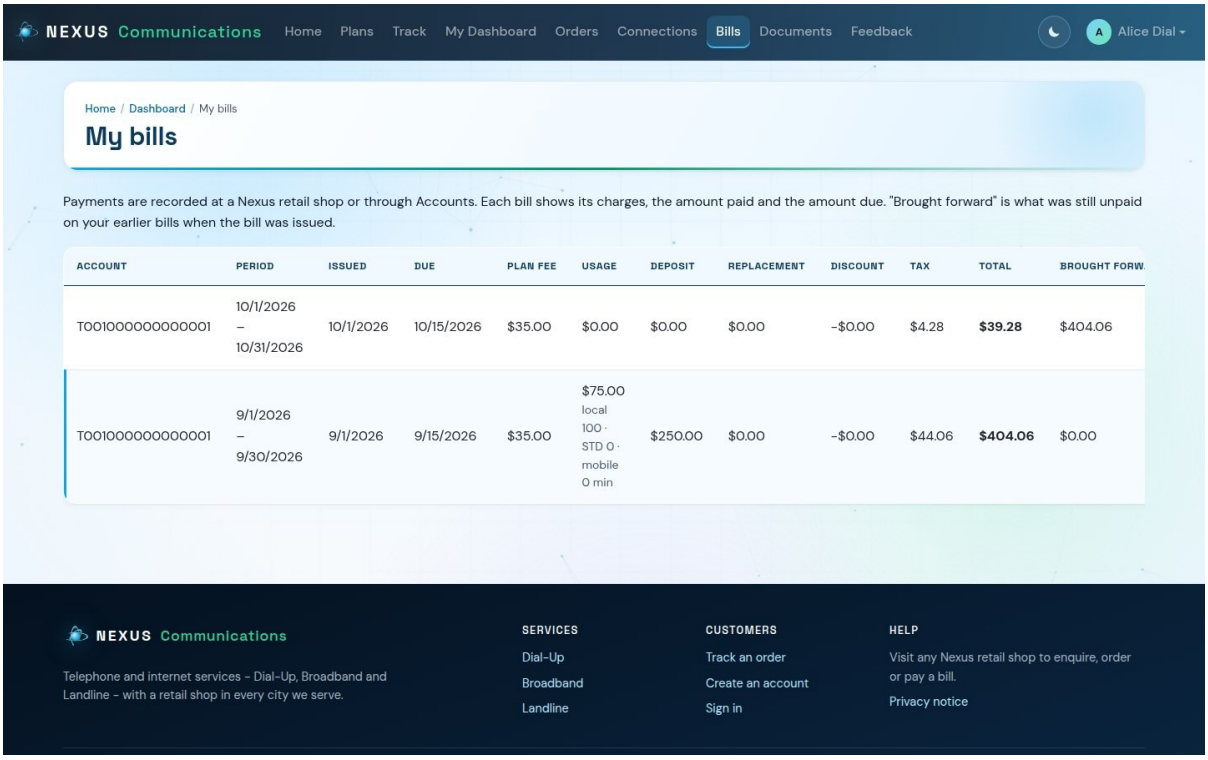

Figure 11 - Itemised bills

4.6 Documents, profile and feedback

- **Documents** - upload proof of identity or address (PDF or image) and download what you uploaded.

- **Profile** - update your phone number, e-mail and address.
- **Feedback** - send a comment or complaint to Nexus; the administrator reads every message.

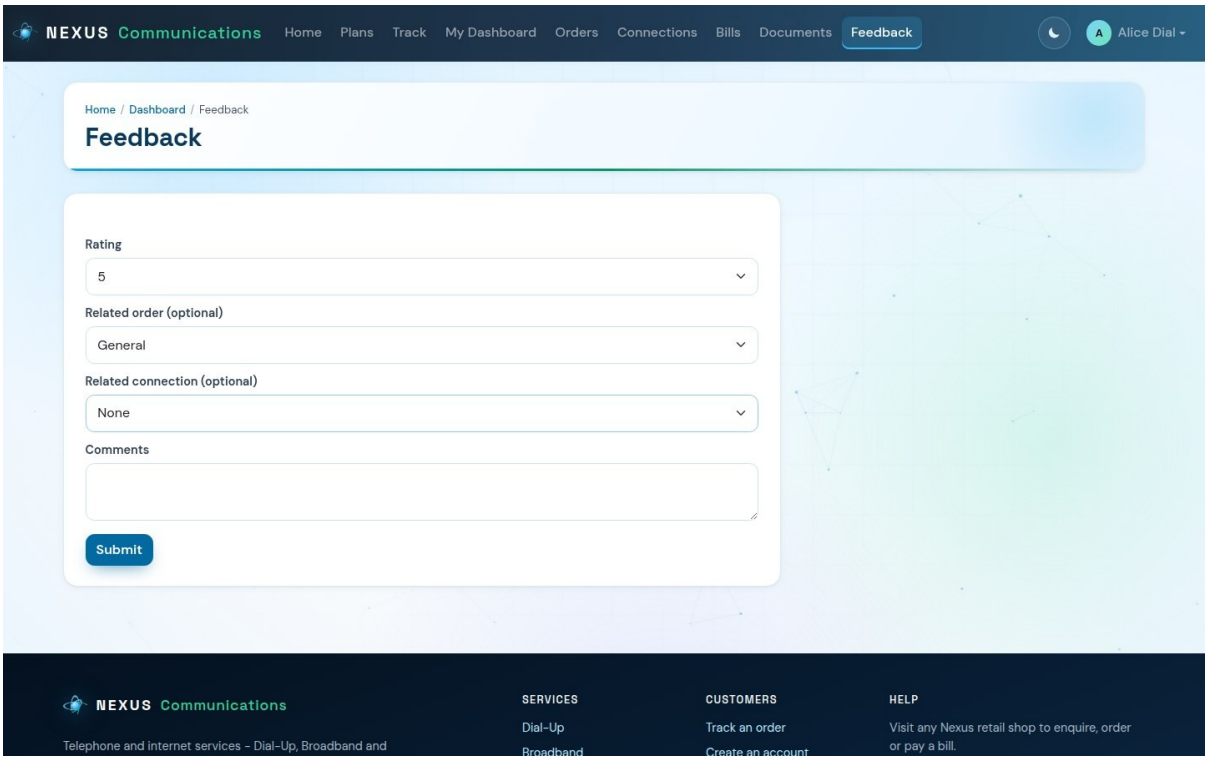

Figure 12 - Feedback form

5. Retail Shop Staff Guide

Retail staff work for one shop. They see only their own shop's customers, orders and bills.

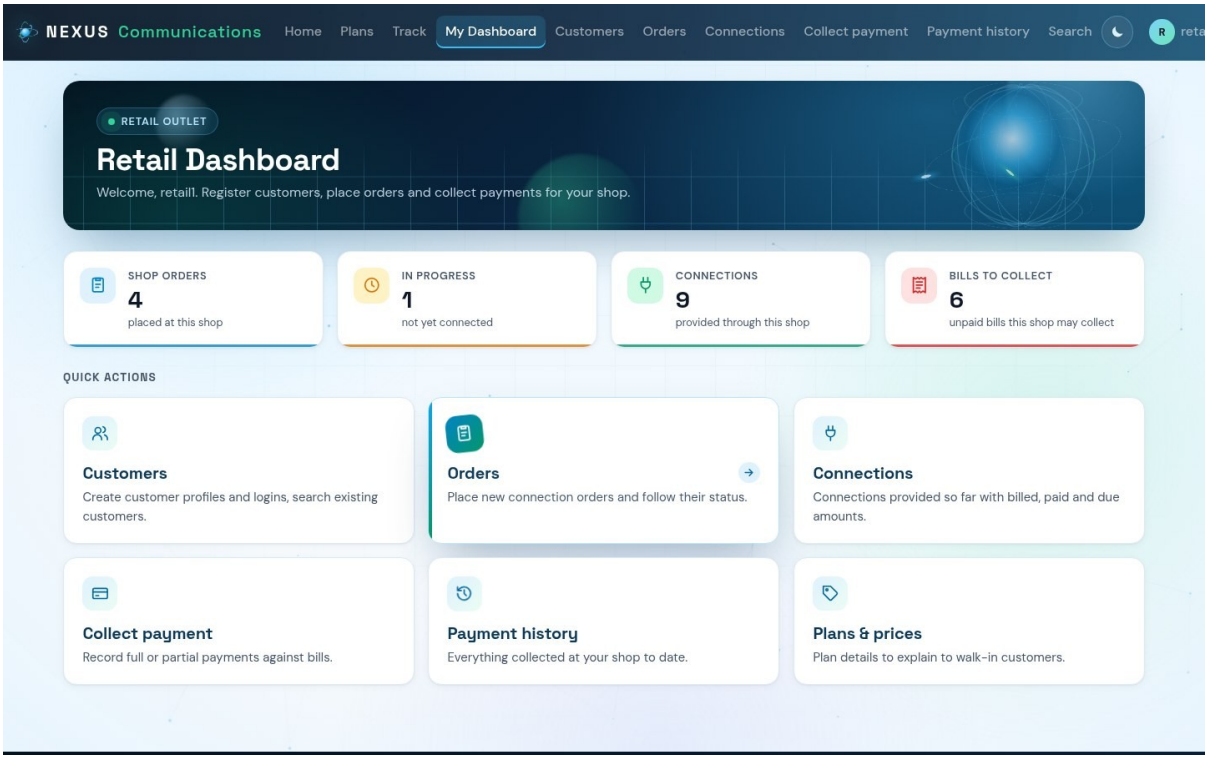

Figure 13 - Retail dashboard

5.1 Registering a walk-in customer

1. Open **Customers** and click **New customer**.
2. Enter the customer's details; the city is set to your shop's city.
3. Save. The customer can now be given an order.

5.2 Placing an order for a customer

1. Open **Place order** and choose the customer.
2. Choose the connection type and plan (and a landline plan when a Dial-Up customer has no landline).
3. Enter the installation address and the number of connections, then click **Place order**.
4. Give the customer the order number printed on the confirmation.

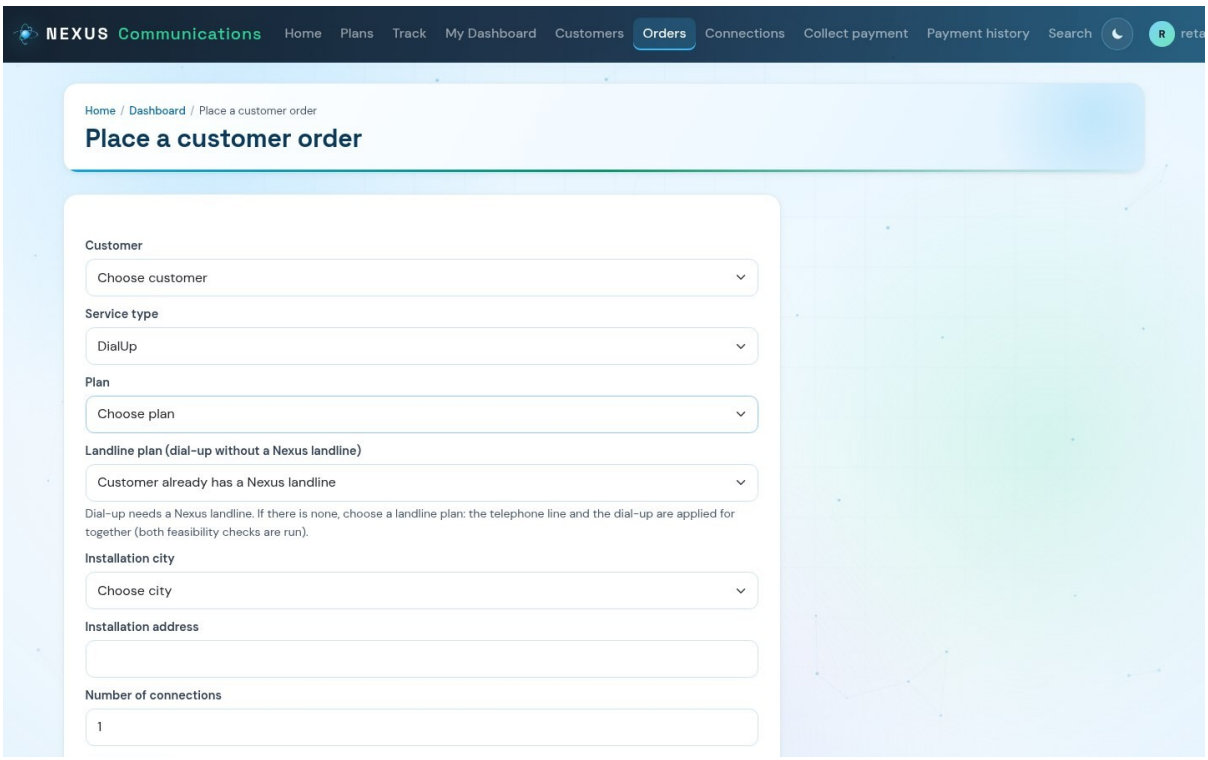

Figure 14 - Placing an order at the shop

5.3 Collecting a bill payment

1. Open **Collect payment**. Bills with money still due are listed.
2. Click **Record payment** next to the bill, enter the amount and payment method, and save.
3. The bill status changes to Partially paid or Paid. Earlier unpaid bills are paid first.

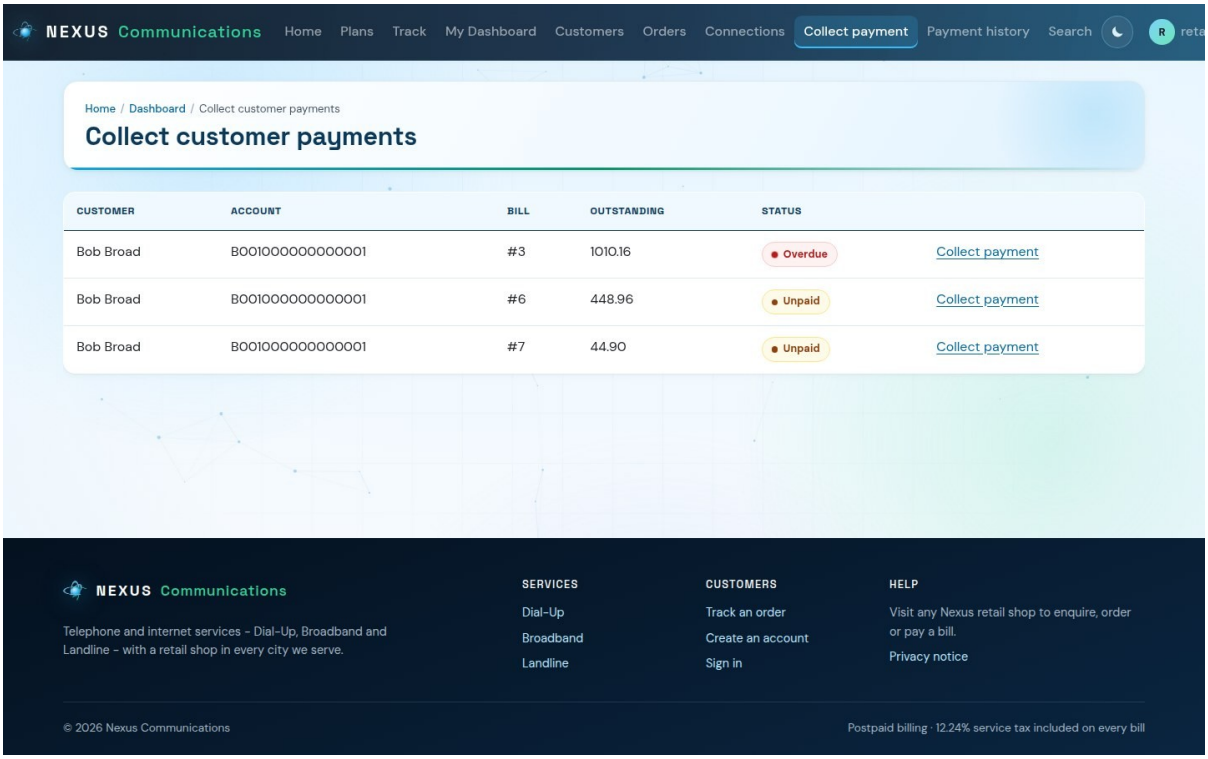

Figure 15 - Bills the shop can collect

6. Technical Staff Guide

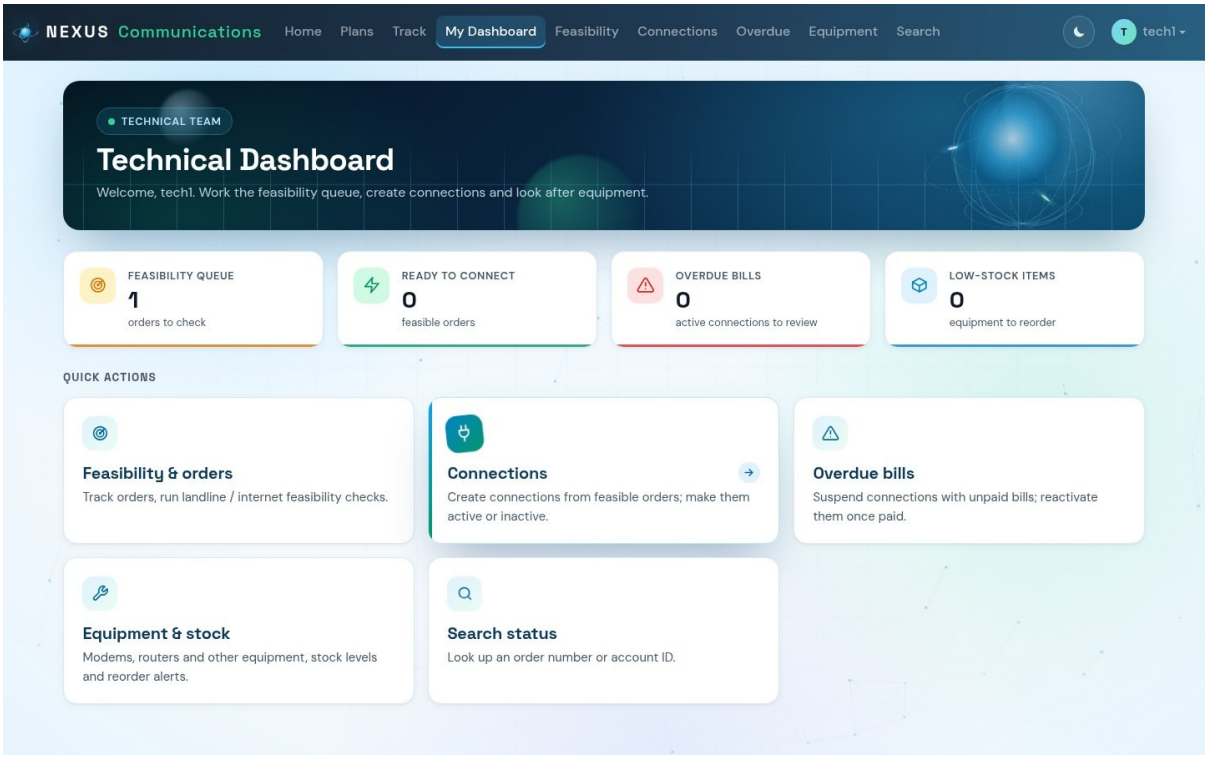

Figure 16 - Technical dashboard

6.1 Feasibility check

1. Open **Feasibility**. New orders waiting for a check are listed.
2. Click **Start checks** on an order. A distance check and a server-capacity check are created.
3. Click **Record result** on each check, choose **Feasible** or **Not feasible**, add remarks and click **Save result**.
4. When both checks are feasible the order becomes Feasible; the customer sees the result when tracking it.

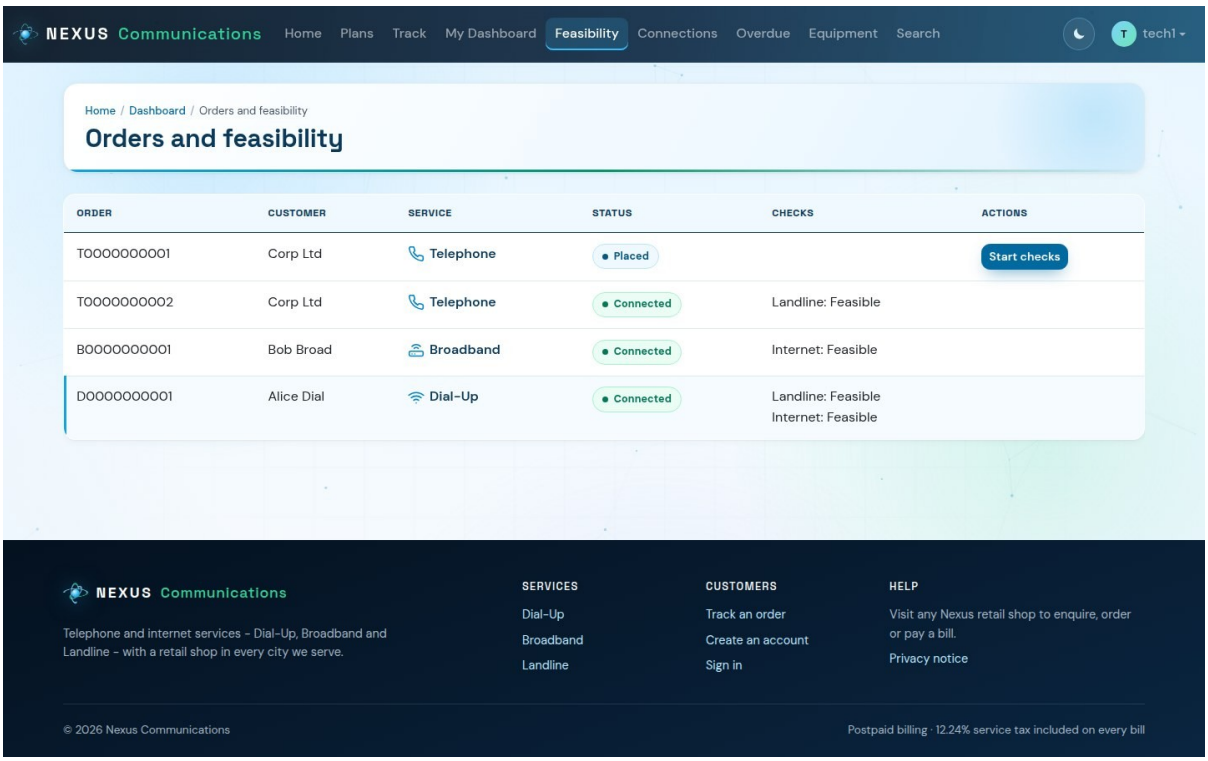

Figure 17 - Feasibility queue

6.2 Creating a connection

1. On the Feasibility page click **Provision** next to a feasible order.
2. Enter the phone number (landline), choose the equipment to supply and its serial number - stock is reduced automatically.
3. Click **Provision connections**. The system creates the connection and its 16-character account ID.

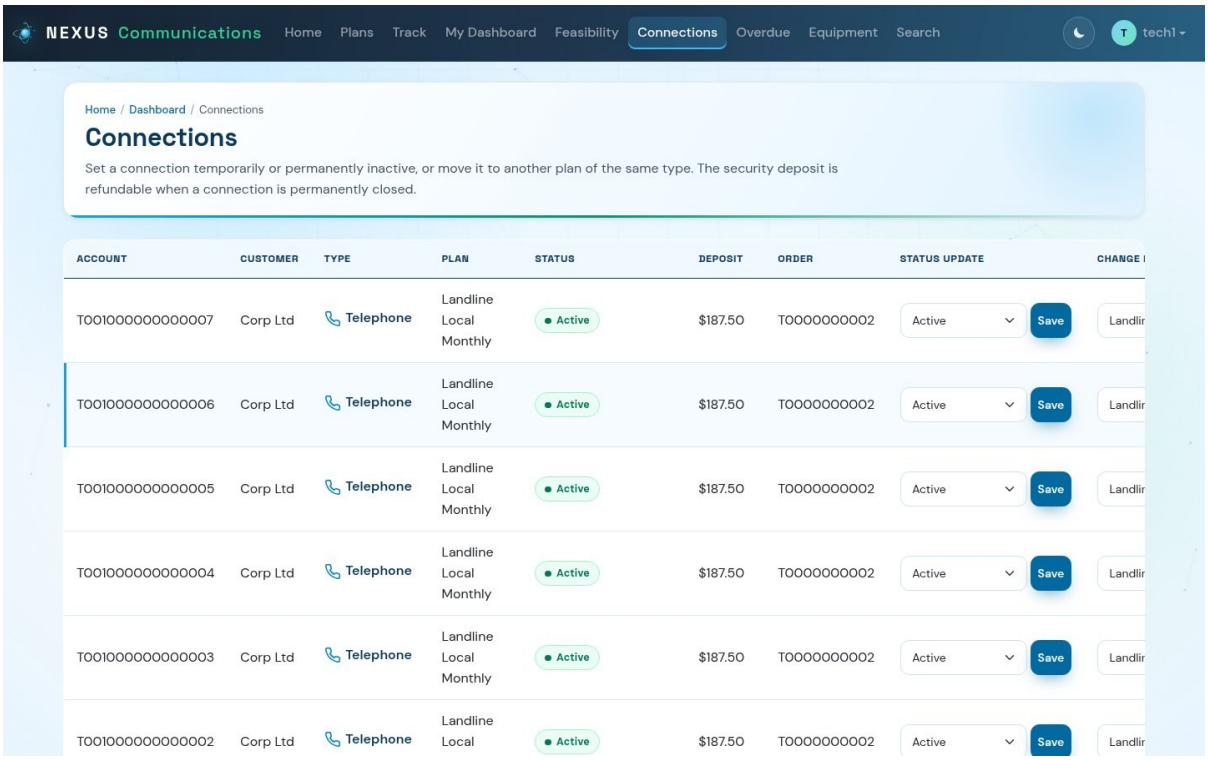

Figure 18 - Connections

6.3 Overdue bills - suspend and reactivate

Overdue lists active connections that have a bill past its due date. Click **Suspend** for one connection or **Suspend all**. When every bill of a suspended connection has been paid, it appears with a **Reactivate** button.

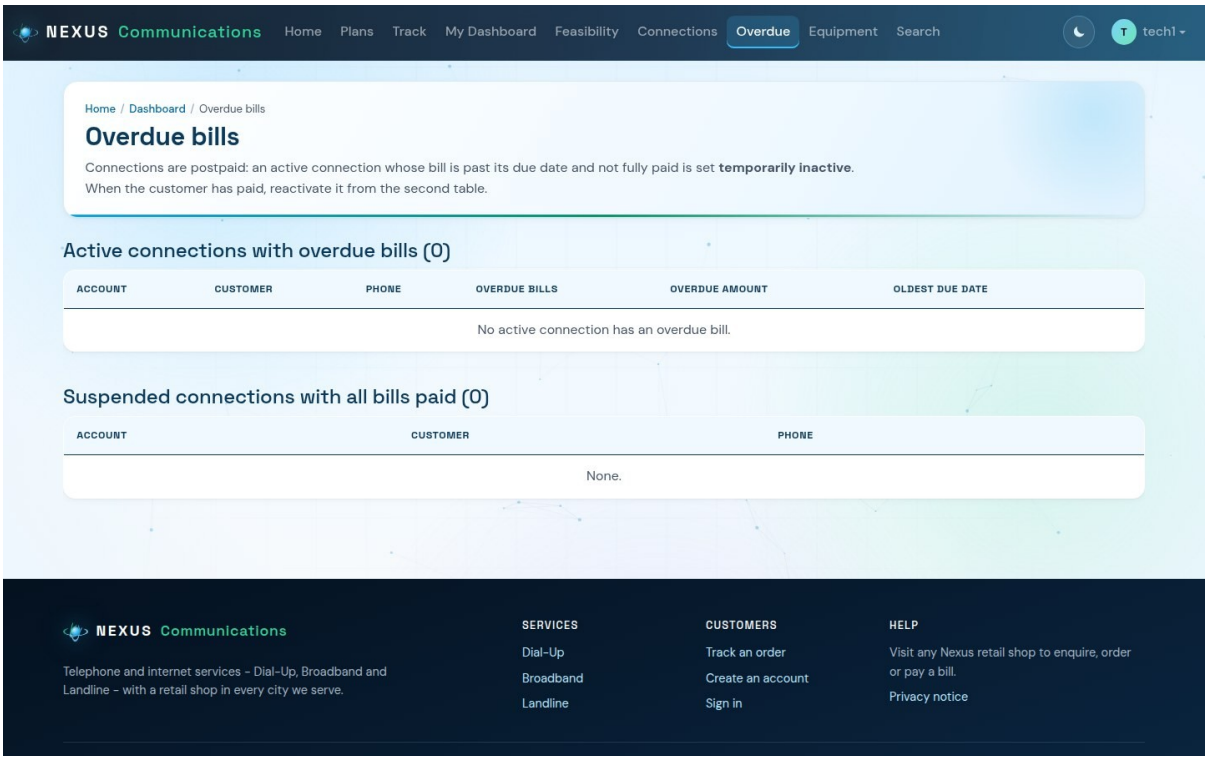

Figure 19 - Overdue connections

6.4 Other tasks

- Change a connection's plan, or close it permanently (the deposit becomes refundable).
- Replace faulty equipment; the old item is recorded and the new one is taken from stock.

7. Accounts Staff Guide

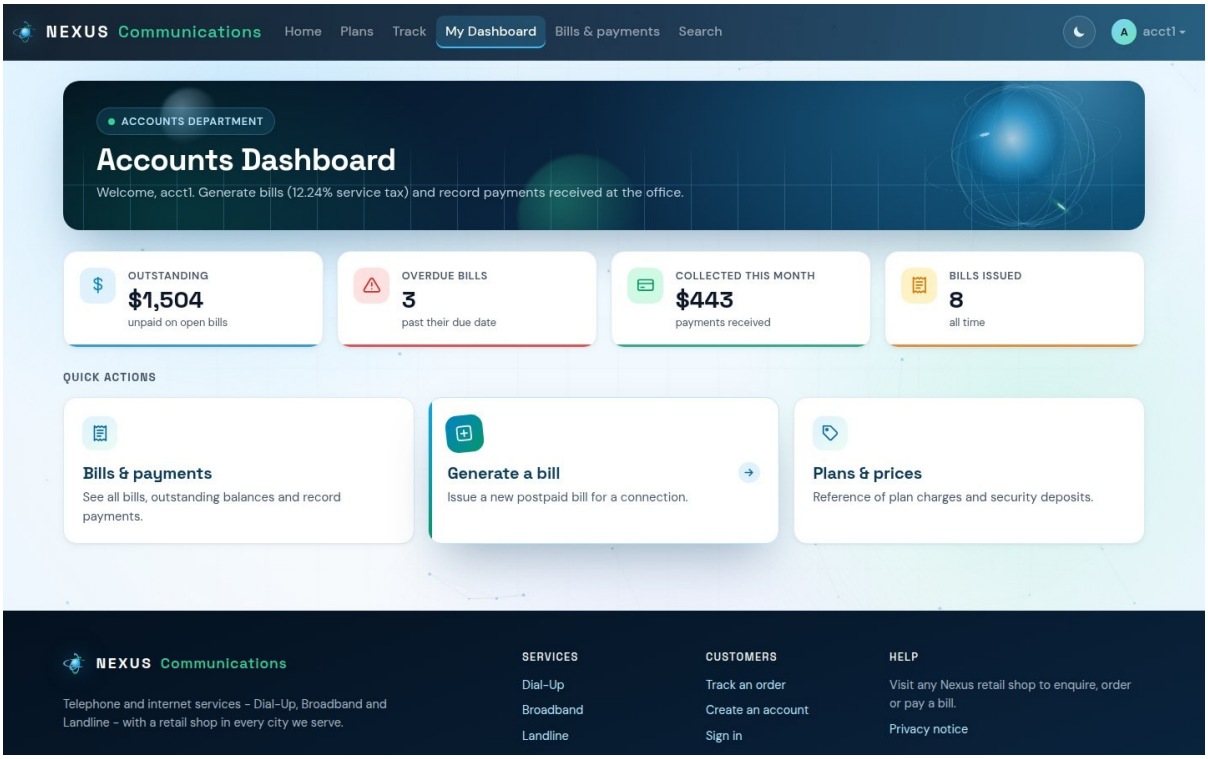

Figure 20 - Accounts dashboard

7.1 Generating a bill

1. Open **Generate bill** and choose the connection and the billing period.
2. For a landline, enter the local, STD and mobile call minutes and any other usage charge.
3. Check the **charges preview**: plan charge, calls, deposit on the first bill, bulk discount and 12.24% tax.
4. Click **Generate bill**. The bill is issued with a due date.

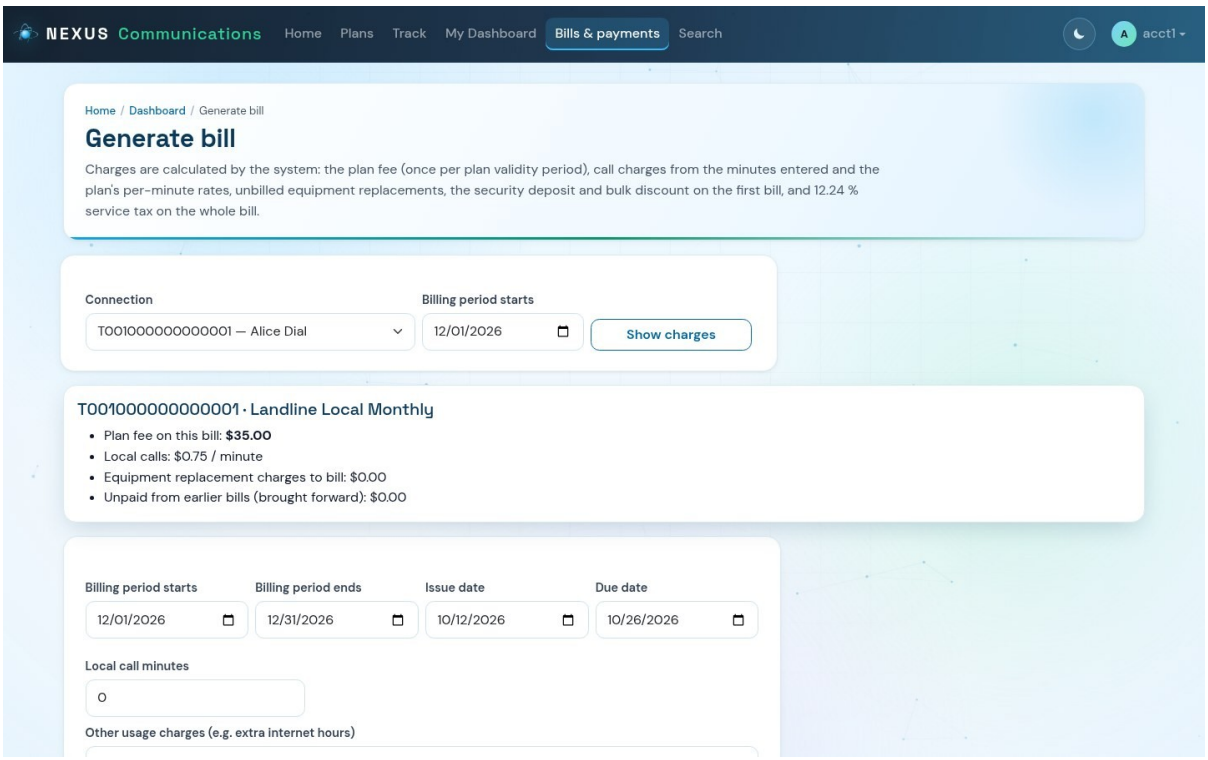

Figure 21 - Generating a bill with the charges preview

7.2 Bills and payments

Bills & payments lists every bill with its total, the amount brought forward from earlier unpaid bills, what has been paid and what is outstanding. Use **Record payment** to record a payment received at the head office.

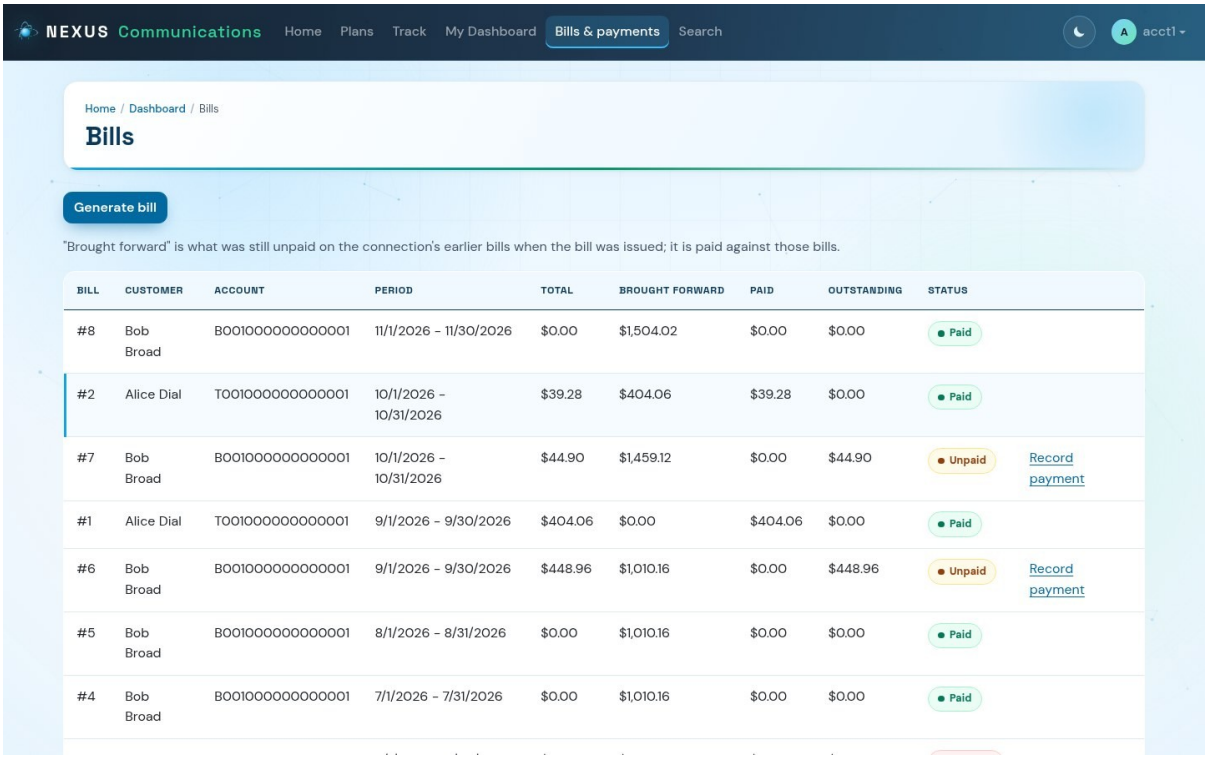

Figure 22 - All bills with status badges

8. Administrator Guide

The administrator signs in with the account created when the system was installed and should change its password after the first sign-in.

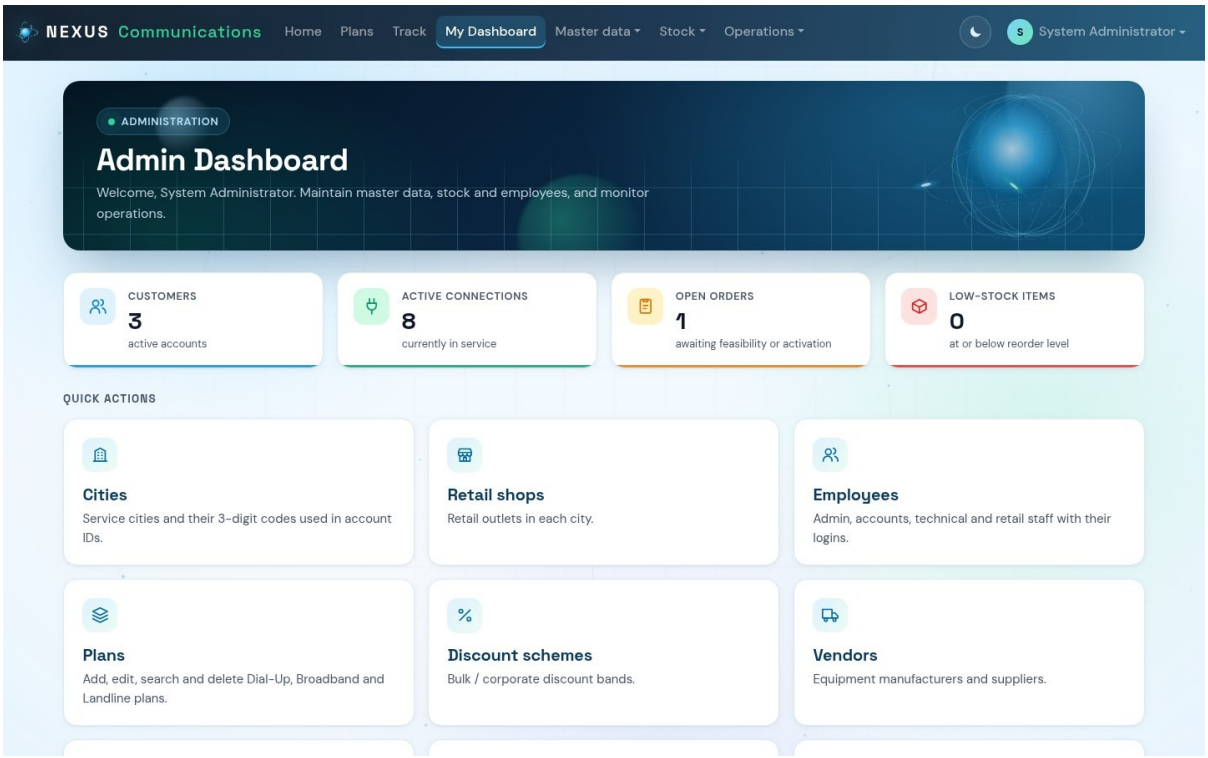

Figure 23 - Admin dashboard

8.1 Master data

Page	What to do there
Cities	Add the cities served. Each has a 3-digit code that becomes part of every account ID issued there.
Retail shops	Add one shop per city with its address and phone number.
Employees	Create staff logins and choose their role (Admin, Accounts, Technical, Retail) and shop.
Plans	Add, edit, search and delete Dial-Up, Broadband and Landline plans, prices and deposits.
Discount schemes	Set the bulk discount bands (for example 10-14 connections: 25%).
Vendors	Equipment manufacturers and suppliers.
Products & stock	Modems, routers and other equipment with stock and reorder level.
Equipment purchases	Record purchases from vendors; receiving them adds to stock.

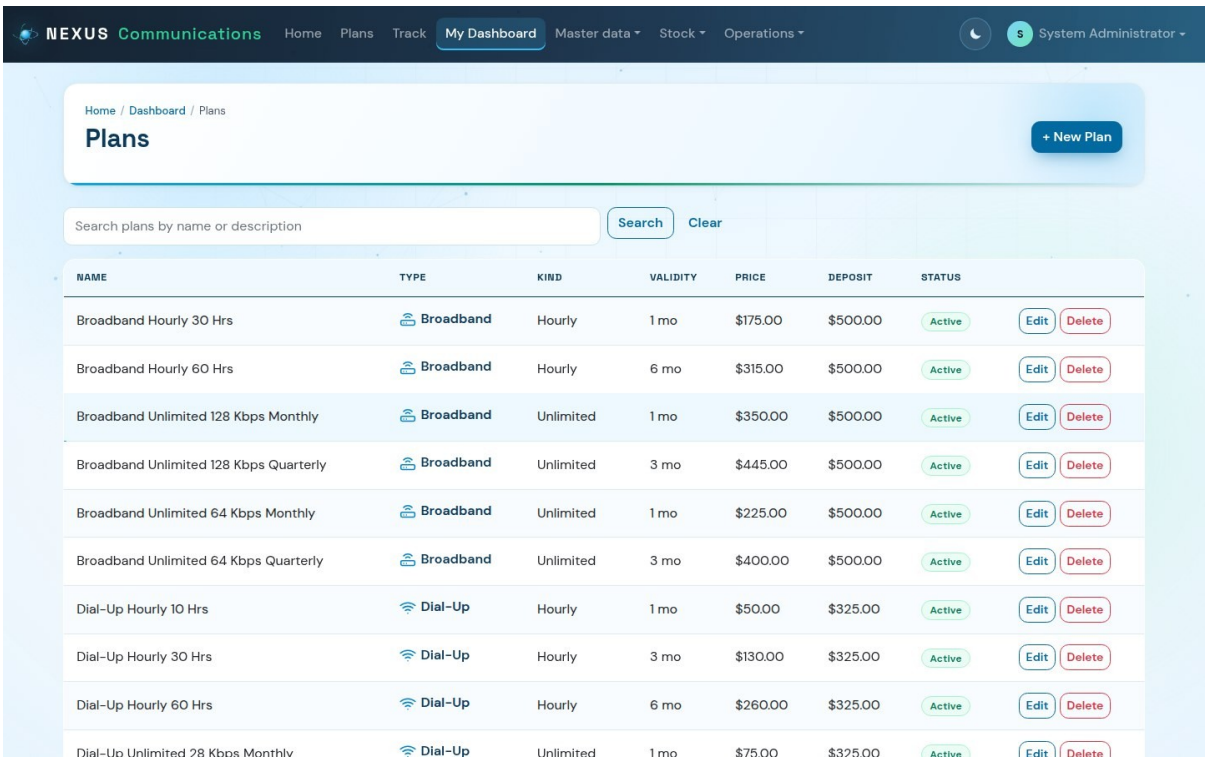

Figure 24 - Managing plans

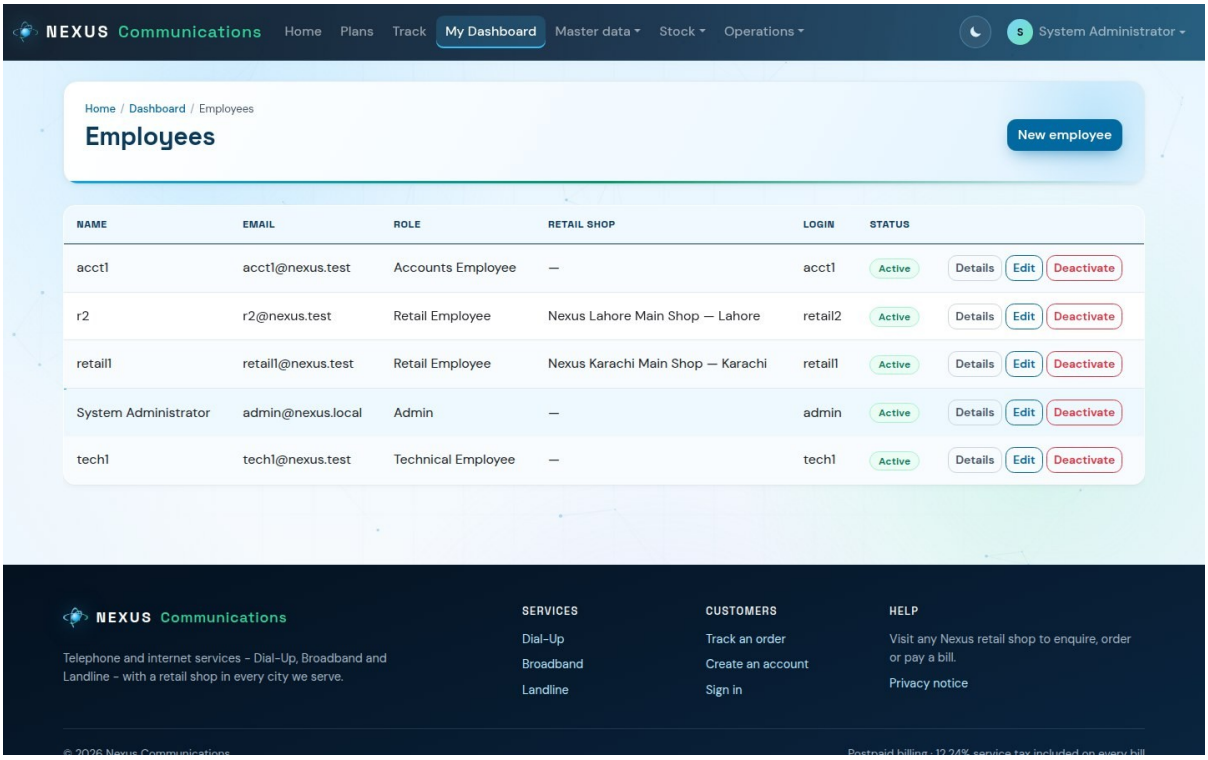

Figure 25 - Employees and their roles

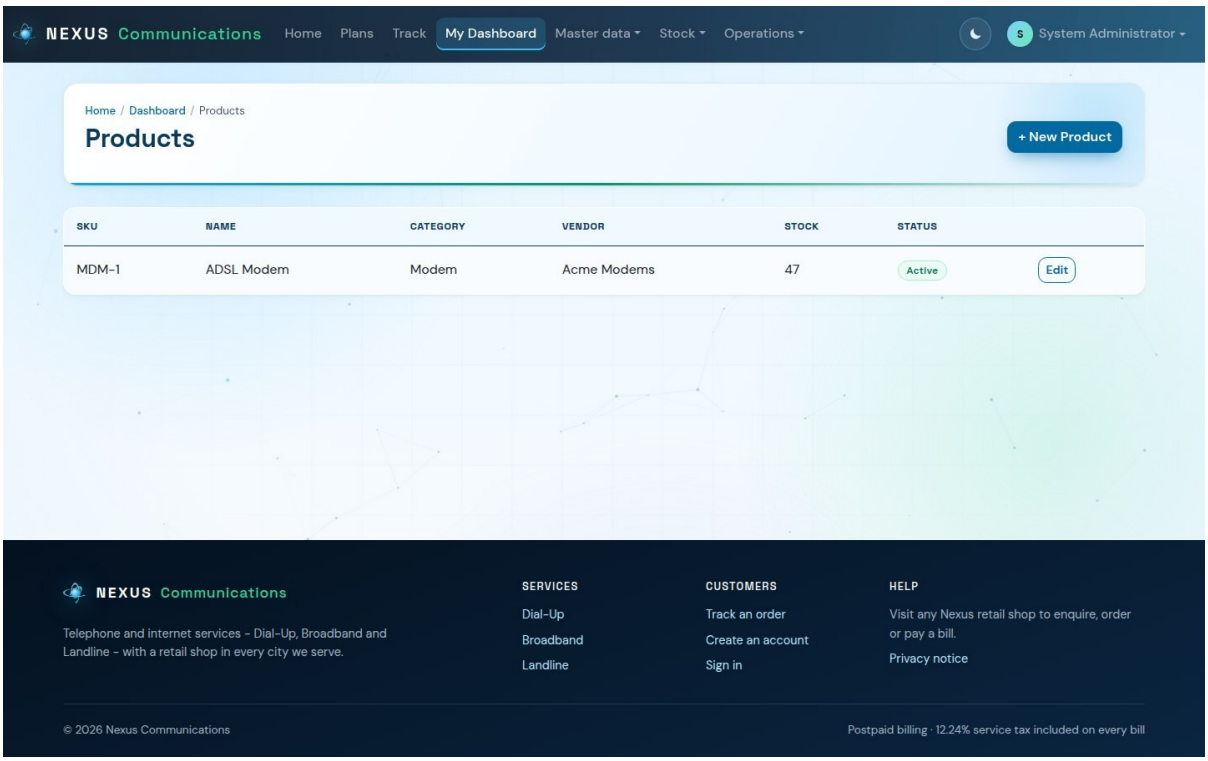

Figure 26 - Products and stock

8.2 Operations

- **Orders** - every order in every city and its progress.
- **Advanced search** - find orders and connections by ID, customer name, contact number, type or date.
- **Reports & feedback** - orders, connections, billing, equipment demand, low stock and customer feedback.

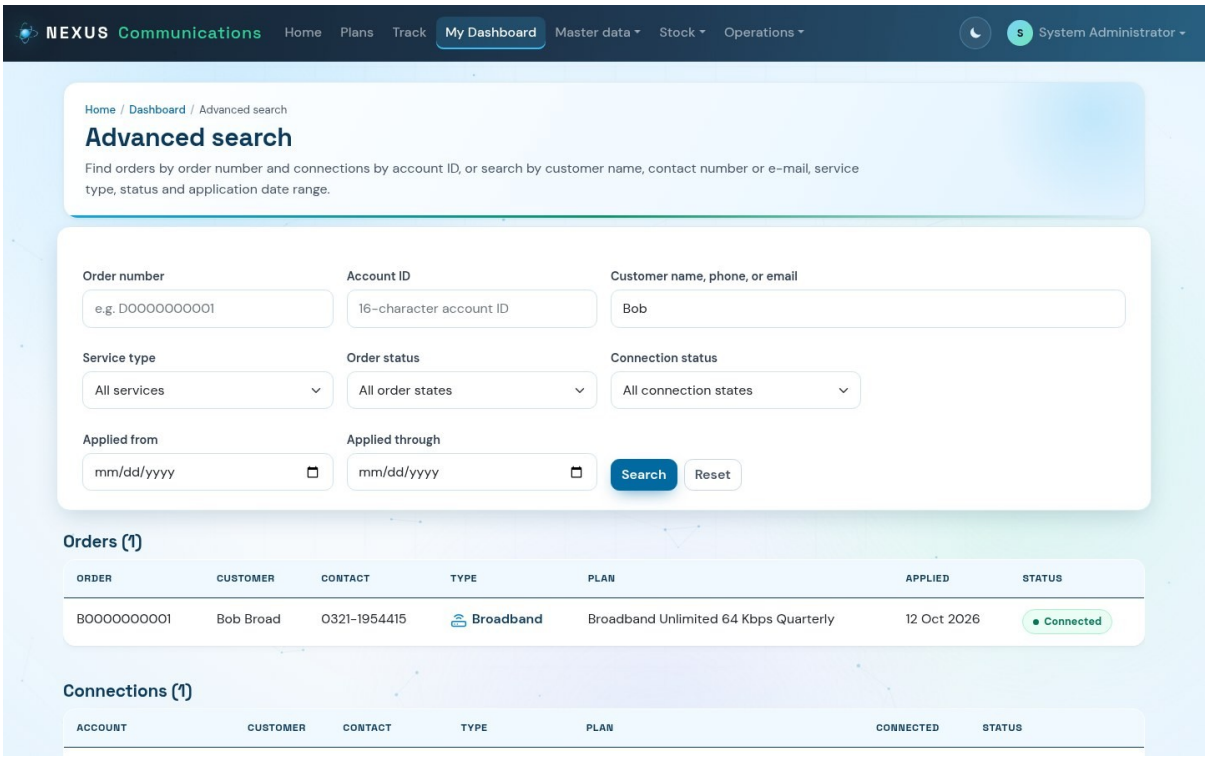

Figure 27 - Advanced search

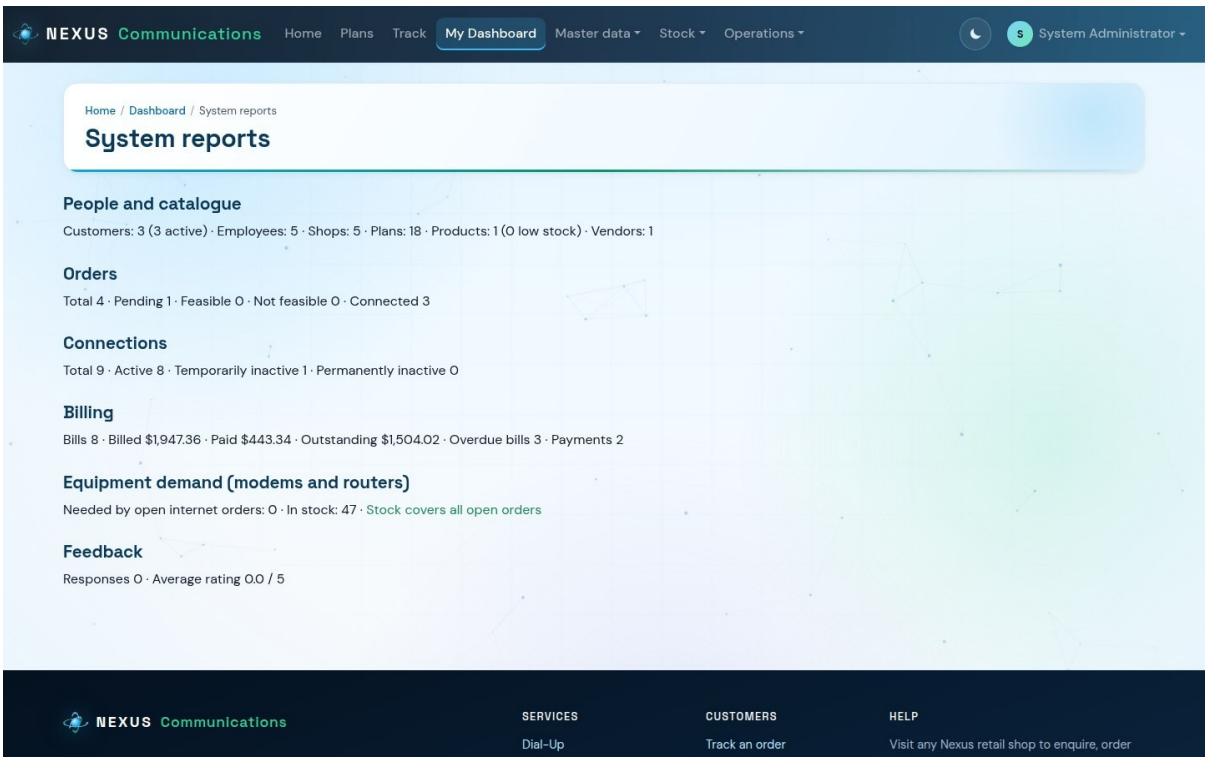

Figure 28 - Reports

9. Quick Reference

9.1 Status meanings

Item	Status	Meaning
Order	Placed	Received; nothing checked yet
Order	Under feasibility check	Technical staff are checking the area
Order	Feasible / Not feasible	Result of the check
Order	Connected	The connection has been created
Order	Cancelled	Withdrawn by the customer or staff
Connection	Active	In service
Connection	Temporarily inactive	Suspended, usually for an overdue bill
Connection	Permanently inactive	Closed
Bill	Issued / Partially paid / Paid	How much of the bill has been paid

9.2 Identifier formats

Identifier	Format	Example
Order number	Service letter (D, B, T) + 10 digits	D0000000001
Account ID	Service letter + 3-digit city code + 12 digits	B001000000000001

9.3 Bulk discount

Connections	Discount on advance and deposit
10 - 14	25%
15 - 24	50%
25 - 49	75%
50 or more	100%

9.4 Troubleshooting

Problem	What to do
Cannot sign in	Check Caps Lock and the username. Staff: ask the administrator to reset the password.
A page says Access denied	The page belongs to another role. Use the menu, which shows only your pages.
Dial-Up plan cannot be ordered	A Dial-Up connection needs a landline - choose a landline plan in the same order.
Order shows Not feasible	The address cannot be served yet; contact the retail shop.
Connection suspended	Pay the overdue bills at any shop; technical staff then reactivate it.
